Activity Report

Name of Activity: Poster Presentation on the occasion of "World Organ Donation Day"

Date of Activity: 13th August 2021

Venue: Online

Number of Participants: 04 Students

Summary:

August 13 of every year is observed as World Organ Donation Day aimed at raising awareness about the importance of organ donation. One person can save up to eight lives from chronic illness by pledging to donate their heart, kidney, pancreas, lungs, liver, intestines, hands, face, tissues, bone marrow, and stem cells. Hence the day strives to help people in realising that volunteering to donate their organs after death can be life-changing for many. People of any age can donate their organs to a person in need.

The first-ever organ donation was done in 1954 when Ronald Lee Herrick donated a kidney to his identical twin brother. Doctor Joseph Murray conducted the procedure for which he has also won the Nobel Prize in Physiology or Medicine in 1990 for advances in organ transplantation.

India has the Transplantation of Human Organs and Tissues Act to regulate organ donation in the country. The law allows both deceased and living people to donate their organs. According to a World Health Organization, around 0.01 per cent of people in India donate their organs after death.

On the occasion of "World Organ Donation Day" Poster Presentation activity was conducted in which 4 students participated. Certificate of participation is provided to all the participants.
