### Activity Report

**Name of Activity:** Quiz on the occasion of "World AIDS Day"

**Date of Activity:** 01<sup>st</sup> December 2021

**Venue:** Online

**Number of Participants:** 127 Students

#### **Summary:**

World AIDS Day, designated on 1 December every year since 1988, is an international day dedicated to raising awareness of the AIDS pandemic caused by the spread of HIV infection and mourning those who have died of the disease. The acquired immunodeficiency syndrome (AIDS) is a life-threatening condition caused by the human immunodeficiency virus (HIV). The HIV virus attacks the immune system of the patient and reduces its resistance to other 'diseases'. Government and health officials, non-governmental organizations, and individuals around the world observe the day, often with education on AIDS prevention and control.

World AIDS Day is one of the eleven official global public health campaigns marked by the World Health Organization (WHO), along with World Health Day, World Blood Donor Day, World Immunization Week, World Tuberculosis Day, World No Tobacco Day, World Malaria Day, World Hepatitis Day, World Antimicrobial Awareness Week, World Patient Safety Day and World Chagas Disease Day.

On the occasion of "World AIDS Day", Quiz activity was conducted in which 127 students participated. Certificate of participation is provided to all the participants.
