|---|---|

**Pre-Requisites:** --

**Course Outcomes:** At the end of the course, students will be able to:

|     |   |
|-----|---|
| CO1 | Apply generic models to structure the software development process.                         |
| CO2 | Illustrate fundamental concepts of requirements engineering and requirements specification. |
| CO3 | Explain different notion of complexity at both the module and system level                  |
| CO4 | Make use of some widely known design methods.   |
| CO5 | Summarize the role and contents of testing activities in different life cycle phases.       |
| CO6 | Explain agile software development  |

**Mapping of course outcomes with program outcomes**

**Course Contents:**

**Unit 1: Introduction to Data Science**

Defining Data Science and Big Data, Recognizing Different Types of Data, Gaining Insight Into Data Science Process Relation with Data Science.

**Unit 2: Data Pre-processing**

Data Preprocessing: Data Quality, Major Tasks in Data Preprocessing, Entity Identification Problem, Redundant Detection and Resolution, Data Reduction, Overview of Data Reduction Strategies.

**Unit 3: Basics of Data Visualization**

Introduction to Data Visualization, Challenges of Data Visualization, Definition and Types of Dashboard, E Dashboard.

**Unit 4: Data Visualization using Python**

Types of Data Visualization: Basic Charts Scatter Plots, Histogram, Advanced Visualization Techniques Like Stream

**Unit 5: Data visualization of multidimensional data**

Need of Data Modeling, Multidimensional Data Models, Mapping of High Dimensional Data Into Suitable Visualization Method-Principal Component Analysis, Clustering Study of High Dimensional Data, V

**Unit 6: Data Analyzing and Visualization using python**

Data Analysis Libraries: Will Learn to Use Pandas Dataframes, Numpy Multi-Dimensional Arrays, and Library: Load, Manipulate, Analyze and Visualize Various Datasets. Matplotlib, Scikit-Learn.

**Text Book:**

Data Analysis Libraries: Will Learn to Use Pandas Dataframes, Numpy Multi-Dimensional Arrays, and Scipy Libraries to Work with a Various Dataset, Pandas, An Open-Source Library: Load, Manipulate, Analyze and Visualize Various Datasets. Matplotlib, Scikit-Learn.

|  |   |
|--|---|
| <b>Unit 3: UNIX Processes</b><br>File Types, The UNIX and POSIX File System, The UNIX and POSIX File Attributes, Inodes in UNIX System V, Application Program Interface to Files, UNIX Kernel Support for Files, General File APIs, Directory File APIs, Device File APIs, FIFO File APIs, Symbolic Link File APIs, File and Record Locking. | 3 |
| <b>Unit 4: Signals and Daemon Processes:</b><br>Signals: The UNIX Kernel Support for Signals, signal, Signal Mask, sigaction, The SIGCHLD Signal and waitpid API, The sigsetjmp and siglongjmp Functions, kill, alarm, Interval Timers.  | 3 |
| <b>Unit 5: Inter-process Communication:</b><br>Introduction, Pipes, popen and pclose Functions, Co-processes, FIFOs, Message Queues, Semaphores, Shared Memory   | 2 |

**List of experiments**

|    |   |
|----|---|
| 1. | Write a C/C++ POSIX compliant program to check the following limits:<br>(i) No. of clock ticks (ii) Max. no. of child processes (iii) Max. path length<br>(iv) Max. no. of characters in a file name (v) Max. no. of open files/ process  |
| 2. | Write a C/C++ POSIX compliant program that prints the POSIX defined configuration options supported on any given system using feature test macros.  |
| 3. | Consider the last 100 bytes as a region. Write a C/C++ program to check whether the region is locked or not. If the region is locked, print pid of the process which has locked. If the region is not locked, lock the region with an exclusive lock, read the last 50 bytes and unlock the region. |
| 4. | Write a C/C++ program which demonstrates interposes communication between a reader process and a writer process. Use mkfifo, open, read, write and close APIs in your program.  |
| 5. | a) Write a C/C++ program that outputs the contents of its Environment list<br>b) Write a C / C++ program to emulate the unix ln command   |
| 6. | Write a C/C++ program to illustrate the race condition.   |
| 7. | Write a C/C++ program that creates a zombie and then calls system to execute the ps command to Verify that the process is zombie.   |
| 8. | Write a C/C++ program to avoid zombie process by forking twice.   |
| 9. | Write a C/C++ program to implement 'system' function.   |
| 10 | Write a C/C++ program to set up a real-time clock interval timer using the alarm API.   |

**Practical List**

1. Write a program to demonstrate use of AWT controls.
2. Write a program to demonstrate different layouts.
3. Write a program to make use of swing controls
4. Write a program to handle different events.
5. Write a program to demonstrate use of Adapter class.
6. Write a program to retrieve hostname and IP address in InetAddress class.

|---|--|

Prerequisites: Basic knowledge of Communication skills and Computer programming, artificial intelligence and data science.

**Course Outcomes:**

Upon successful completion of this course, the students will be able to:

|   |   |
|---|---|
| 1 | Select the appropriate method for solving the problem                     |
| 2 | Make use of various engineering techniques and tools to give a solution   |
| 3 | Justify the method/tools used to develop the solution.                    |
| 4 | Demonstrate tangible solutions to the problem                             |
| 5 | Describe the solution with the help of a project report and presentation. |

**About Mini Project**

The project is a part of addressing societal and industrial needs. Mini project is one of the platforms that students will use to solve real-world challenges. This course focuses on the selection of methods/engineering tools/analytical techniques for problem-solving. Through this course, students gain a thorough understanding of engineering basics and ideas, gain practical experience, have the opportunity to display their skills and learn about teamwork, financial management, communication skills, and responsibility.

  
**Head of Department,**  
Artificial Intelligence & Data Science

Accredited by NAAC 'A' Grade, ISO 9001:2015 Certified  
Yadav (Ichalkaranji)-416121, Dist. – Kolhapur

**Guidelines**

1. Every student shall undertake the Mini project activity for semester V.
2. Minimum three and maximum of five students should work together in Mini project.
3. The students have to work on different approaches and finalize the best methodology to solve the problem in consultation with the project guide.
4. The students should use different tools /Techniques for the development of the solution to the problem.
5. While developing solutions, the student can take care of effective use of resources, follow ethical practices, finance management,
6. The solution should be optimal, affordable, user-friendly and environment friendly.
7. Critically analysis and testing of the solution provided.
8. By using IPR, students should reserve their rights of innovations as well as communicate new findings to society with the help of research papers.

The committee of senior faculty members and a project guide will be appointed to monitor the progress and continuous evaluation of each project. The assessment shall be done jointly by the guide and committee members.

T.Y. (AI & DS Engineering ) Semester VI

| Course Contents:   | Hours          |
|--|----------------|
| <b>Unit I</b><br><b>Data Mining:</b> Introduction, What is Data Mining?, Data Mining – on what kind of Data? Data Mining Functionalities-What kinds of patterns can be mined?, Classification of Data mining systems, Major issues in Data Mining. | <b>6Hours</b>  |
| <b>Unit II:</b><br><b>Data Warehouse and OLAP Technology:</b> What is Data Warehouse? A multidimensional Data model, Data Warehouse architecture. From data warehouse to Data mining.  | <b>6 Hours</b> |
| <b>Unit – III</b><br><b>Cluster Analysis:</b> What is cluster Analysis? Types of data in cluster analysis, Categorization of major clustering methods. Partitioning methods.   | <b>6 Hours</b> |
| <b>Unit – IV</b><br><b>Classification and Prediction:</b> What is Classification and Prediction? Issues regarding classification and prediction. Classification by Decision Tree Induction. Bayesian Classification. Back propagation              | <b>6 Hours</b> |
| <b>Unit – V</b><br><b>Data Warehouse and OLAP Technology:</b> What is Data Warehouse? A multidimensional Data model, Data Warehouse architecture. From data warehouse to Data mining.  | <b>6 Hours</b> |

T.Y. (AI & DS Engineering ) Semester VI

|       |     |                  |       |          |
|-------|-----|------------------|-------|----------|
| AD602 | PCC | Machine Learning | 3-0-0 | 3Credits |
|-------|-----|------------------|-------|----------|

| Teaching Scheme                     | Examination Scheme  |
|-------------------------------------|---|
| Lecture: 3hrs/week<br>Tutorial: --- | CA I: 10<br>Marks CA II: 10 Marks<br>Mid Semester Exam:<br>30 Marks End Semester Exam: 50 Marks |

**Pre-Requisites:** Statistics, data science.

**Course Outcomes:** At the end of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Make use of basics of machine learning to perform classification algorithms                |
| CO2 | Choose & differentiate different supervised learning algorithms for solving the problems   |
| CO3 | Solve the problems by making use of concepts of neural networks                            |
| CO4 | Identify suitable hypothesis by choosing correct theory among different theories           |
| CO5 | Choose and apply clustering algorithm and identify its applicability in real life problems |

**Mapping of course outcomes with program outcomes**

| Lecture:<br>2hrs/week<br>Tutorial: --- | CA 1: 10 Marks<br>CA 2 : 10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Course Outcomes:** At the end of the course, students will be able to:

|     |  |
|-----|--|
| CO1 | Introducing Angular for developing modern, complex, responsive and scalable web applications ion |
| CO2 | Understanding full architecture behind an Angular applicat                                       |
| CO3 | Understanding single-page applications with modern JavaScript frameworks                         |
| CO4 | Understanding concepts of advanced web development.  |
| CO5 | Devise an architecture for solving the given problem.  |
| CO6 | Develop a web application using Angular and other back end technologies.                         |

| Course Outcomes | Program Outcomes |     |     |     |     |     |     |     |     |      |      |      |      |      |      |

|        |     |                    |       |           |
|--------|-----|--------------------|-------|-----------|
| AD604A | PCC | Web Technology Lab | 0-2-0 | 1 Credits |
|--------|-----|--------------------|-------|-----------|

| Teaching Scheme:                  | Examination Scheme:   |
|-----------------------------------|---|
| Lecture:<br>2hrs/week<br>Tutorial | CA I:15<br>MarksCAII:1<br>5Marks<br>EndSemesterExam:<br>20Marks |

**Course Outcomes:** At the end of the course, students will be able to:

|     |   |
|-----|---|
| CO1 | Use LAMP Stack for web applications   |
| CO2 | Use Tomcat Server for Servlets and JSPs   |
| CO3 | Write simple applications with Technologies like HTML, Javascript, AJAX, PHP, Servlets and JSPs |
| CO4 | Connect to Database and get results   |
| CO5 | Parse XML files using Java (DOM and SAX parsers)  |

### Experiment List

1. Design the static web pages required for an online book store web site.
2. Write JavaScript to validate the fields of the Registration page
3. Develop and demonstrate the usage of inline, internal and external style sheet using CSS
4. Develop and demonstrate JavaScript with POP-UP boxes and functions .5) Write an HTML page that contains a selection box with a list of 5 countries. When the User selects a country, its capital should be printed next in the list. Add CSS to customize The properties of the font of the capital (color,bold and font size).
5. Write an HTML page including any required JavaScript that takes a number from text
6. Field in the range of 0 to 999 and shows it in words. It should not accept four and above
7. Digits, alphabets and special characters.
8. Develop and demonstrate PHP Script for the following problems:
9. Write a PHP Script to find out the Sum of the Individual Digits.
10. Write a PHP Script to check whether the given number is Palindrome or not

| CO4 | Design Angular Directories  |
| CO5 | Demonstrate Filters in angularjs, angularjs filter example in controller                      |
| CO6 | Demonstrate Angularjs filter orderby example, Angularjs filter orderby descending / ascending |

**Course Contents:**

1. Write a program to Use number expressions in angularjs.
2. Implement Angularjs string expressions for concatenation, AngularJS string expressions for string comparison
3. Implement Angularjsjson object expression
4. Implement Angularjs array expression to check if array contains data, Angularjs expression to check if array empty
5. Implement Directives in angularjs with example
6. Program To demonstrate Filters in angularjs, angularjs filter example in controller

**Head of Department,**  
Artificial Intelligence & Data Science  
SHARAD INSTITUTE OF TECHNOLOGY  
COLLEGE OF ENGINEERING,  
Yadrav (Ichalkaranji) Dist. Kolhapur.

### Mega Project Phase-I

|       |      |                      |       |           |
|-------|------|----------------------|-------|-----------|
| PRJ05 | PROJ | Mega Project Phase-I | 0-0-4 | 2 Credits |
|-------|------|----------------------|-------|-----------|

|                  |                                    |
|------------------|------------------------------------|
| Teaching Scheme: | Examination Scheme:                |
| Lecture: -       | Continuous Assessment 1: 25 Marks  |
| Practical:       | Continuous Assessment 2: 25 Marks  |
|                  | End Semester Examination: 50 Marks |

**Pre-Requisites:** All courses

**Course Outcomes:** At the end of the course, students will be able to:

|      |   |
|------|---|
| CO1  | State the exact title of the project and problem definition.                  |
| CO2  | Explain the motivation, objectives and scope of the project.                  |
| CO3  | Review the literature related to the selected topic of the project.           |
| CO4  | Design the mechanism, components of the system and prepare detailed drawings. |
| CCO5 | Evaluate the cost considering different materials/manufacturing processes.    |

**(An Autonomous Institute)**

The students in a group of not more than FOUR will work under the guidance of the faculty member on the project work undertaken by them. The completion of work, the submission of the report and assessment should be done at the end of VII Sem.

The project work should consist of any of the following or appropriate combination:

1. A comprehensive and up-to-date survey of literature related to study of a phenomenon or product.
2. Design of any equipment and / or its fabrication and testing.
3. Critical Analysis of any design or process for optimizing the same.
4. Experimental verification of principles used in applications related to various specializations related to Mechanical Engineering.
5. Software development for particular applications.
6. A combination of the above.

It is expected that the students should complete at least 50% of the total project work in VI Semester. The objective is to prepare the students to examine any design or process or phenomenon from all angles, to encourage the process of independent thinking and working and to expose them to industry. The students may preferably select the project works from their opted elective subjects. The students should submit the report in a prescribed format, before the end of VII semester. The report shall be comprehensive and presented typed on A4 size sheets and bound. Number of copies to be submitted is number of students plus two. The assessment would be carried out by the panel of examiners for both, term work and oral examinations.

| Practical:       | End Semester Examination : 50 Marks |

**Pre-Requisites:** Basic knowledge of all courses

**Course Outcomes:** At the end of the course, students will be able to:

**Course Description:-** Internship / Training is educational and career development opportunity, providing practical experience in a field or discipline. At the end of the **Fourth and Fifth semester**, every student should undergo practical training in an industry / professional organization / Research laboratory with the prior approval of the HoD/TPO/Principal of the college and submit the report along with the completion certification from the Industry/ Organization. The report will be evaluated during the **Sixth semester** by the department.

**Course Learning Outcomes:-**

After successful completion of the course, students will be able to

1. Verify the Technical knowledge in real industrial situations.
2. Develop interpersonal communication skills.
3. Discuss activities and functions of the industry in which the Internship/training has done.
4. Write the technical report.

**Prerequisite:** - Basics of Mechanical Engineering, Good written and Oral Communication.

**Guideline for Students:-**

1. Arrive at work as per schedule, ready to work and stay for the agreed upon time.
2. Present yourself in a professional manner at all times, including being appropriately dressed at workplace.
3. Communicate any concerns with your supervisor and the internship/Training coordinator in a timely manner and respectfully.
4. Demonstrate enthusiasm and interest in what you are doing, ask questions and take the initiative as appropriate.
5. Complete and submit assigned tasks by designated timelines. Meet all deadlines.

Page 4 of 42

**Student's Diary/ Daily Log**

**Head of Department,**  
Artificial Intelligence & Data Science  
SHARAD INSTITUTE OF TECHNOLOGY  
COLLEGE OF ENGINEERING,  
Yadav (Ichalkaranji) Dist. Kolhapur.

The main purpose of writing daily diary is to cultivate the habit of documenting and to encourage the students to search for details. It develops the students' thought process and reasoning abilities. The students should record in the daily training diary the day to day account of the observations, impressions, information gathered and suggestions given, if any. It should contain the sketches & drawings related to the observations made by the students.

The daily training diary should be signed after every day by the supervisor/ in charge of the section where the student has been working. The diary should also be shown to the Faculty Mentor.

Student's Diary and Internship Report should be submitted by the students along with attendance record and an evaluation sheet duly signed and stamped by the industry to the SITCOE immediately after the completion of the training. It will be evaluated on the basis of the following criteria:

- Regularity in maintenance of the diary.
- Adequacy & quality of information recorded.
- Drawings, sketches and data recorded.
- Thought process and recording techniques used.
- Organization of the information.

#### **Internship Report**

After completing the internship, the student should prepare a comprehensive report to indicate what he/she has observed and learned in the training period. Daily diary will also help to a great extent in writing the industrial report since much of the information has already been incorporated by the student into the daily diary. The competent authority should sign the training report. The Internship report should be evaluated on the basis of following criteria:

- i. Originality.
- ii. Adequacy and purposeful write-up.
- iii. Organization, format, drawings, sketches, style, language etc.
- iv. Variety and relevance of learning experience.
- v. Practical applications, relationships with basic theory and concepts taught in the course.

#### **Evaluation of Internship/Training**

  
**Head of Department,**  
Artificial Intelligence & Data Science
